

Superannuation Update – April 2026

Payment Options from 1 July 2026

Outlined below are your superannuation payment options effective 1 July 2026, along with your responsibilities to remain compliant.

Superannuation Payment Options

a) **Pay Direct** via Super Fund Portals (Recommended for small payroll liabilities). From 1 July 2026, you are required to pay your superannuation obligations on the same day you process payroll, this can be achieved via the relevant super fund portals.

- Payments must clear in the super fund's bank account within **7 business days** to be compliant.
- Until 30 June 2026, you may continue to process superannuation monthly or quarterly as you do currently.

b) Use OZEDI – Integrated Superannuation Service

You may choose to open a superannuation account with our new service provider, OZEDI, starting May 2026.

- We will provide a Microbase-specific access link to create your account.
- You can select from various payment options offered by OZEDI.
- Fees apply and are charged directly by OZEDI:
 - \$0.20 per employee
 - \$0.25 per super fund payment (If multiple employees belong to the same fund, the fee remains \$0.25.)
- Payroll in Automation will link directly with OZEDI, eliminating manual data entry.

c) Use an Alternative Super Stream Provider

You are not obligated to use OZEDI. If you choose an alternative super Stream service provider:

- Automation allows you to export a SAFF file
 - This file can be imported into any compliant supe stream system
-

User Responsibilities

We strongly recommend that you review these options and decide well in advance which best suits your business. In many cases if you are dealing with only a few employees and a couple of super funds it may be easier to simply pay contributions when you process payroll via the fund's online portal.

If your payroll requirements are more complex, setting up automatic payment and distribution to the various funds we suggest OZEDI would be the system of choice.

OZEDI Account Setup Links

If you choose OZEDI's Super Stream service:

- Ensure your account is opened before we distribute the next V4 update (April 2026), make sure your account is operational well in advance of June 30th.
- Below is a list of links that will help you setup an OZEDI account:
 - Registration
<https://dashboard-ebusiness.ozedi.com.au/registration?link=1119897115-R>
 - Microbase Help Notes (Account setup)
https://www.microbase.com.au/guest/OZEDI_Account_Creation
 - OZEDI Pricing

Note: Microbase Asia Pacific Pty Ltd is responsible for delivering the data from Automation in a form that can be processed via the OZEDI platform. If you encounter any errors while transferring data through the Automation gateway then please use our support services. However, be aware **we are not responsible for the operation or account setup via the OZEDI dashboard**, for advice on the initial account setup you will need to contact the OZEDI help desk.

Support line: [1300 737 614](tel:1300737614)

Email: support@ozedi.com.au

The OZEDI option requires you to work through the various setup steps, their support desk can assist you with account setup and dashboard management. Microbase is responsible for the creation of an export file from Automation that can be processed on OZEDI's platform, we can assist you with any errors you may incur.

Opening an account with OZEDI and setting up the Automation integration **does take some time, plus to avoid errors you have to ensure that ALL details are 100% correct**. Once you have the integration operational then it will function with no user input besides process your pays – **again correctly**.

Failure to complete setup in advance may result in processing delays or non-compliance.

Payroll Integration Development Update – OZEDI

Our programmers are working on payroll integration with OZEDI, most of the ground work is now completed. It is our intention to finalise development by the end of April 2026, at which time we will distribute a new version of Automation 4 that will **enable you to integrate Automation to your OZEDI account.**
