Release Notes Version 3.6.1

Overview: Version 3.6.1 sees the introduction of a link to Bursons Ezyparts application which allows for the import of items directly to the Automation Premium job card. Due to changes in the income tax rates this version includes an update to the tax tables for the 18/19 fiscal year. Finally, we have expanded the functionality of the parts / inventory utility to allow for easier management when dealing with multiple parts.

Bursons Ezyparts Integration

Overview: Version 3.6.1 introduces the ability to allow importation of parts data to the job card directly from the Ezyparts catalogue. Automation Premium links vehicle data to the catalogue so when you open Ezyparts providing the vehicle information can be interpreted you can use the view option in Ezyparts to locate the vehicle from a WIP list to locate parts that are applicable to the specified make and model.

Ezyparts Setup: To setup your Ezyparts link you will firstly need to download a copy of the application from Bursons Auto Parts from <u>http://www.burson.com.au/ezypartsezypartsinstall</u>, this needs to be authorised to be able to function. Once you have done this you next need to establish the link between Automation and Ezyparts. From the top of screen go to File / Site Settings / Online Settings in the centre of screen you will need to enter your Ezyparts credentials.

Items are imported as inventory, if they are not in stock the item will be highlighted red in which case to establish the status of the items required you can raise an order directly from our job card (not integrated to Bursons).

Tax Tables

Version 3.6.1 will automatically load the latest available tax table formulas. Continue to use the calculate tax function in the way you always have within Automation and the deductible will reflect the ATO ruling.

Parts & Inventory Utility

Overview: This version introduces expanded functionality when wanting to work with multiple items there are now two new options:

Delete Items: Allows you to select multiple items that have not been referenced elsewhere in the data for deletion. Select the option to the right under Multiple Parts Manipulation, point and click on the items you wish to delete, finalise with OK (F12) accept the option to move forward with OK (F12).

Note: Items that form part of a registered transaction will not be deleted.
